

# Covid19

*David Jimeno*

*08/5/2020*

En este estudio queremos tener una visión por escalas desde nuestra Comunidad Autónoma Aragón, pasando a nivel nacional para finalmente hacer un análisis internacional. Queremos entender el virus, su comportamiento e incidencia por países y la visualización de datos de cada uno de ellos en el tiempo.

Lamentablemente nos centraremos en la mayor parte del estudio en los fallecidos que a pesar de proporcionar cifras con retraso, son más fiables que las de contagios detectados de los que se estima que se detecta a nivel nacional una fracción inferior debido a la falta de test y rastreo de la población.

Veamos la evolución de fallecidos diarios en Aragón.

```
ggplot(covar,aes(x=fecha,y=Fallecimientos.nuevos),na.rm =TRUE)+geom_bar(stat="identity", position="dodge")
ggtitle( "Evolución de fallecidos diarios en Aragón")
```

### Evolución de fallecidos diarios en Aragón

Veamos a continuación la evolución fallecidos diarios en la Comunidad de Madrid.

```
ggplot(covar,aes(x=fecha,y=Fallecimientos.nuevos),na.rm =TRUE)+geom_bar(stat="identity", position="dodge")
ggtitle( "Fallecimientos diarios nuevos en la Comunidad de Madrid")
```

## Fallecimientos diarios nuevos en la Comunidad de Madrid

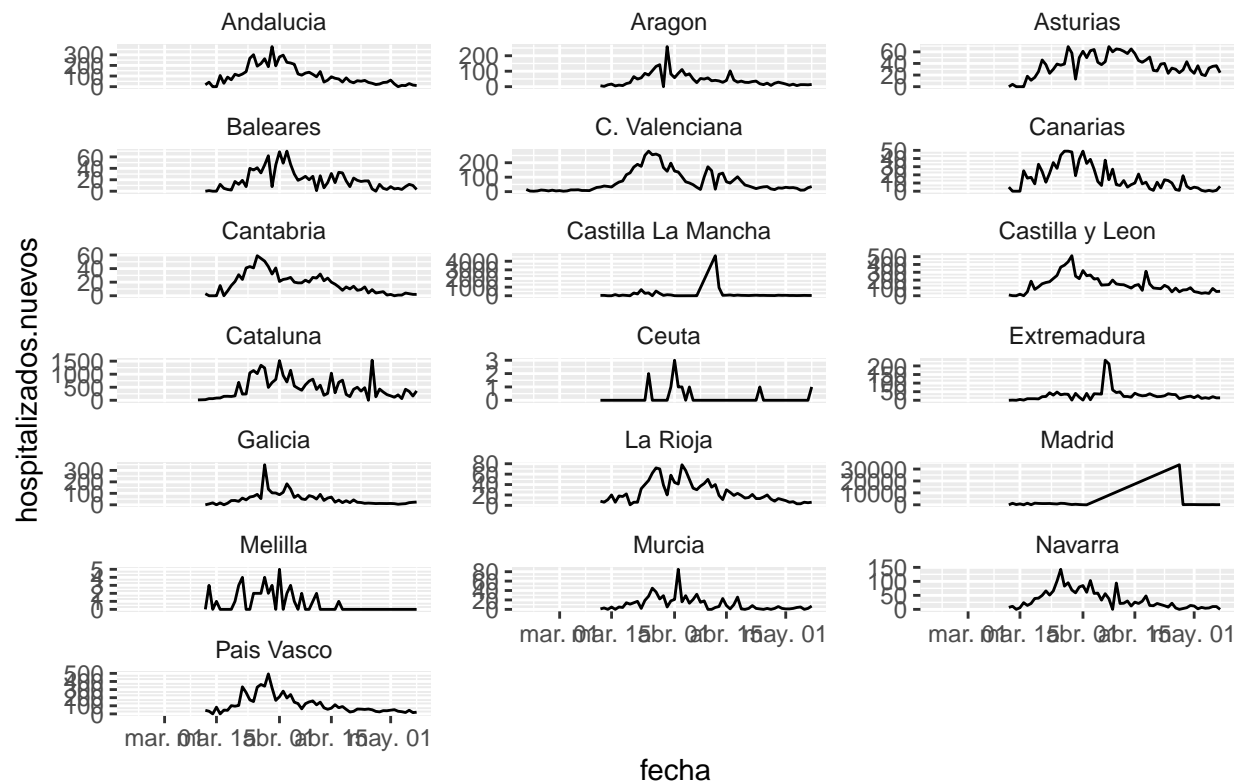

```
